

PLC Exp Interface Trainer

Category: Mechatronics · Model reference: MZM-2011

SPECIFICATIONS

DESCRIPTION :

MZM-2011 is most suitable for the user who wants to teach or study PLC (Programmable Logic Controller) based experiments and application interface. It can be interfaced to all types of PLC in the market, such as OMRON, Panasonic, Siemens & etc. The unit includes all the built-in connectors to ease circuit wiring and construction. Also bundled with a student workbook packed with all the experiment samples and tutorials.

SPECIFICATION :

- Input switches: 4 pushbutton and 4 toggle switches
 - 4 output neon lamps
 - Inductive proximity sensor (x1)
 - Capacitive proximity sensor (x1)
 - Photo sensor (x1)
 - Dual 7-Segment LED (with decoder drivers)
 - Traffic Light Module with Pedestrian Crossing
 - Output Speaker (x1)
 - DC Fan (x1)
 - Connection via built in 4mm connector interface
 - Built-in power protection
 - Comes with operation manual and lab student workbook (with experiment samples)
